Subject: Microsoft Settlement

After following this company closely for the last ten years I feel that you have done the industry and consumers a great injustice with this settlement. They have disregarded previous attempts to control their monopoly status and this settlement will not alleviate the problem. Currently Microsoft is hampering innovation by wiping out competition before it gets a chance to prosper. There have been no major advances in computer software & technology in the last ten years due to the practices of this company. Isn't this what you are supposed to prevent? This is not a 'friendly' monopoly! I urge you to reconsider this action.

Thank you for your time.
